## B-Clean Degreasing Gel *for Hands & Solid Surfaces*

*Safe • Effective • Saves Cost*

### • What is B-Clean?

B-Clean is a solvent free, non-caustic, concentrated degreaser. A non-chlorinated, non-aromatic, non-flammable, non-toxic product designed to quickly remove heavy industrial grease.

### • How B-Clean works?

The rapid action formula of B-Clean ensures thorough cleaning. B-Clean has to be mixed with 20 to 200 times its volume of plain water. This ratio varies with the application and stubbornness of the soil. The diluted product; when applied to the surface to be cleaned; promptly starts its action to penetrate oils and grease. Quickly solubilizes, breaks down and 'lifts' grease, dirt, oil, paint, grime, etc which can be rinsed off.

### • Where to use B-Clean?

B-Clean degreases engines, hydraulic cylinders, and any other heavily soiled parts without use of harmful solvents. B-clean has a very slow evaporation rate and emits no harmful fumes. Effectively removes oil, paint, varnishes, carbon black, putty, graphite, and other dirt. It is ideal for use in industries such as factories, garages, building, printing, oil/gas exploration, oil refining, steel, metallurgy, shipbuilding, machinery, machine repair, aircraft maintenance, and other related industries.

### • B-Clean for Hands Degreasing

B-Clean clings to hands, instead of falling into the sink of flowing away, and effortlessly rinses the hands clean. The high performance, pH balanced formula promotes skin comfort while leaving hands spotless, silky smooth and refreshed, giving the shop-floor team confidence in their hands "on and off" the job

## **B-Clean** *(Environment Friendly De-greaser Gel)*

B-Clean is a rapid action, broad spectrum degreaser that removes the toughest industrial, institutional and oil filed dirt and grime. It is a heavy duty cleaner developed with novel technology to provide improved removal of particulates and organics. B-Clean is a rapid action, high performance, biodegradable product causing no sludge or scale. It is a water based product that loosens the soils for easy removal and thorough rinsing.

The unique formula allows B-Clean to be used as a multi-metal cleaner. It is compatible with other materials like plastics, ceramics, glass and fabric. B-Clean is ideal also for removal of grease from hands and garments. Its diverse application capabilities allow easy product integration into present cleaning programs. The advanced 'No-VOC' and 'No-Caustic' formula of B-Clean helps to meet the EHS (Environment Safety & Health) norms. B-Clean is therefore an environmentally safe alternative to solvents and hazardous chemicals.

## **B-Clean Benefits**

- Multiple application methods allow easy product integration into present cleaning programs.
- Ideal for Maintenance Professionals, Contractors & Service Engineers.
- Surpasses competitive chemistries in both lab and field tests.
- USDOT Non-regulated; easy to ship, store, and apply
- Non-Hazardous, non-toxic product & Biodegradable.
- Contains no VOC, nitrites, phosphates or caustic.
- Non-chlorinated product
- Emits no harmful fumes.
- Environment friendly product
- Can be used in-situ or in the field.
- Can be used with Pressure Washers.
- Can be used for cleaning hands and skin.
- No color, no smell, eliminates allergic reactions.
- User friendly product; ensures user safety.

## **B-Clean Applications**

- Oil rigs, Refineries, Petro products, Lube
- Automotive, Aircraft maintenance, Ship maintenance
- Railway workshops, State Transport Bus workshops, Bearings, Printing press
- Vegetable oil production, Dairies, Kitchen, Food and beverage, Hospitality
- Metals, Wood, Glass, Plastic, Polycarbonate cleaning
- Textile and laundry, Garments, Carpet cleaning
- Governments, Municipalities, Military
- Building and construction
- Hospitals & Institutes

## **B-Clean Compatibility**

- Heated tanks
- Pressure washers
- Automatic Washers
- Ambient Temperature Ultrasonic Systems
- Manual cleaning
- Spray
